

Year 6 Summer Term

Welcome back after the Easter break. This term we will continue with our exciting thematic curriculum – ‘Global Warning’. We will also become entrepreneurs to make and sell products to raise funds for our fun day.

Maths

Within Maths, we will be finishing off our Year 6 topics including; Statistics, translation, symmetry, shape and time. The children will then complete mathematical challenges to ensure they continue applying skills post SATS.

English

English learning will have a strong focus on the required standard at the end of Year 6 – children will continue to write sentences with ambitious vocabulary and punctuation, whilst manipulating sentences for effect. Children will be encouraged to use a variety of higher-level punctuation, in order to make sentences more varied and interesting for the reader. They will be writing at length this term, in order to provide more detailed pieces of writing that culminates the skills they have learnt and are demonstrated within their writing. Learning will be based around a variety of genres and stimuli including a short animation film – Francis.

Modern Foreign Languages

In MFL the children will be learning how to speak and write in French. They will be learning about transport and will continue to improve their pronunciation.

Religious Education

The children will be looking at values and what matters most to the children and the wider community.

Topic

“Global Warning” is a thematic unit, which is geography-focused with sustainability and eco literacy at its heart. This project-based theme involves pupils applying their learning about the global environmental issues of waste and pollution by creating a board game, which is both educational and fun. The pupils will work in groups to research, design and produce their board game, after which they will present and demonstrate it to the class.

After this, the children will complete two more units – Time Team and I have a Dream.

P.E

Children will be learning skills involved in striking and fielding, outdoor athletics, gymnastics and dance.

Science

In science, we will focus on evolution and inheritance, learning about fossils and how natural selection occurs.

PSHE

Children will have plenty of time in PSHE to have sessions based around transition to high school. Firstly we will focus on physical health and mental wellbeing, growing and changing including human reproduction and birth before finishing in summer 2 with Keeping safe including, keeping personal information safe; regulations and choices; drug use and the law and drug use and the media.
