

Year 5 Spring Term

Amazing Africa

Welcome back after the Christmas break. We hope that you have had an enjoyable time with family!

This term we are continuing with our exciting, thematic approach to teaching, which delivers the programmes of study. This term our focus turns to Amazing Africa!

MFL, R.E and Science will be taught discreetly.

Maths

As mathematicians in Year 5, the children will be continuing to develop their mental maths skills including improving their times tables knowledge and speed. Mental and written strategies of the four rules of number will be a key focus again in Arithmetic with the introduction of written methods for multiplication and division. Children will then begin to develop their knowledge and apply their skills to problems involving fractions, decimals and percentages!

English

In English, the children will be learning how to develop their use of grammar and punctuation (e.g. using commas, brackets and colons). We will cover poetry, narrative, non-chronological reports and recounts. The children will have spellings to learn on a weekly basis from both their class teacher and phonics' teachers. Children are also encouraged to read regularly and continue to complete detailed reading journals.

Science

Children will also be studying the life cycles of mammals, amphibians, insects and birds. As well as all this, they will learn about reproduction in some plants and animals. Pupils will also learn about animal habitats, which will lend itself well to our topic of 'Amazing Africa.'

M.F.L.

Children will learn basic conversational skills and build up their knowledge of French vocabulary, including colours, parts of the body, animals, the weather and hobbies. Learning will take place through games, songs, poems, stories and activities based upon La Jolie Ronde Scheme.

Religious Education

The children will be learning about when, how and why Christians pray. Children will also compare other religions and how they pray too.

Design and Technology/ Art

Children will be using different sources of information to create designs inspired by African cultures and tribes. They will be using printing techniques to create a tribal t-shirt.

PE

This term children in Class 17 will have the opportunity to attend swimming lessons. These lessons will be available to all children across the year. In P.E lessons children will be taught invasion games (netball, basketball etc) and a continuation of gymnastics. The children will be applying new skills as well as embedding skills previously taught.

Geography

Children will be using a variety of atlases and maps to locate Africa and the human and physical geography of the continent, including: settlements, rivers, mountains, biomes and the impact of extreme weather and deforestation. They will gather information about 2 countries within Africa in order to compare.

Music

As musicians the children will be learning to sing songs and finding out how to accompany their songs with simple percussion instruments. They will also be learning how to create rounds using a range of percussion. Music will be inspired by Africa and the use of African drums, with special visitors joining us for an amazing workshop later in the term.

PSHE.e

Our focus for this term will be 'Living in the Wider World'. Children will have the opportunity to identify how to protect the environment, investigate how information online is targeted and identify job interests and aspirations.

Computing

In computing, children will be creating their own African Digital Art using a variety of software. They will be given the opportunity to select and use graphics and photos which they will edit to create effects to impact on others.
